Global Network of Healthcare Professionals

Background

Since 1997, SurveyHealthCare has been providing healthcare data collection services to the market research industry. The quality of our Healthcare Network, along with our unwavering commitment to exceeding client expectations is the cornerstone of our success.

We reach the Americas, Canada, Europe, Asia, and Russia more comprehensively than anyone else. **We maintain: 1,500,000 physicians, nurses, office / hospital / clinic personnel, technicians, dentists, pharmacists, HMO senior staff and 500,000 patients and sufferers.**

In the United States we maintain both a traditional e-mail panel with hundreds of thousands of physicians and healthcare professionals and an enhanced Panel Plus service. Panel Plus enables us to offer a more rigorous sampling approach, as we maintain fax and telephone numbers for those HCP's who may not want to provide their email address for ongoing panel surveys. In this way we can reach more physicians, complete hard quotas much quicker, better match client provided lists and provide more representative samples for trending studies.

We have spent years building our network of Healthcare Professionals. When you need to interview patients and caregivers as well as Healthcare Professionals around the world, please contact SurveyHealthCare. We offer a variety of options to best meet your study needs.

Enclosed you will find our list and counts of the Healthcare Professionals and Patients we maintain in our database.

Phone: 212-290-7642
